

Stepping Stones

An early intervention initiative that provides individualized support to develop communication, social, and daily living skills through 1:1 intervention and small-group learning.

PROGRAM STRUCTURE

Morning or Afternoon 1:1 Intervention

- Students work with a Behaviour Therapist on individualized goals, such as:
- Developing communication skills (e.g., requesting, labelling, responding).
- Building social skills (e.g., turn-taking, joint attention).

Small-Group Learning (Group of 4 Students)

- Students receive 1:1 support in a small-group setting, focusing on:
- School readiness (e.g., following routines, sitting for group activities).
- Pre-academic skills (e.g., shapes, colours, numbers).
- Fine motor skills (e.g., cutting, writing).
- Peer interaction skills (e.g., sharing, initiating play).

The Stepping Stones Program combines individualized instruction with guided social and academic practice in a structured, intensive early intervention approach. Supervision by a Registered Behaviour Analyst (ONT) is included in the program fees, ensuring expert guidance, monitoring, and progress evaluations.
